THE VAN BESOUW ATELIER

CREATE YOUR OWN UNIQUE RUG

The chosen rug, the designed shape and the carefully selected edging. All elements converge at the Van Besouw atelier.

COMPUTER-CONTROLLED CUTTING

All rugs are cut by computer. A cutting plan is drawn up for each rug and the carpet is cut from the roll in a dimensionally stable manner. This minimises cutting loss and ensures an efficient process.

FINISHING OF THE RUG

Finishing the rugs is craftsmanship. All rugs are taken in hand one by one and finished with the desired look and feel.

FINISHING TOUCHES

The perfection of your unique design is due to the finishing touches provided by Van Besouw.

The precise finish that we ensure by hand gives the whole a quality standard that you would expect from Van Besouw. Extensive choice of different edge finishes offers combination possibilities which enhance the designed rug. At Van Besouw, we finish our rugs with a volume finish or a blind finish.

A volume rug involves folding the edges of the carpet, which gives the rug a rich and full appearance.

Finishing a rug with a blind border is a minimalist finish where the border is subtly stitched around the rug without visible seams. When the colour of the rug and border matches, the border becomes almost invisible, hence the term "blind."

Finishing \ VOLUME

Finishing \ BLIND

finishing touches

BORDERS

Volume

The essence of a volume finish lies in folded edges, giving the rug a rich, full look. To ensure comfort and prevent slipping, all rugs come with standard anti-slip underlay.

Blind \ COTTON

This cotton look border is made out of polyester, showing a herringbone structure. This border is available in a wide colour range.

Blind \ LEATHER

The exclusive faux leather is a finish that adds extra luxury to a rug. The material is long-lasting and easy to maintain. A calm color palette due to the natural colors.

Blind \ SUEDE

The suede finish is made of ecological microfiber. This luxurious finish offers many possibilities through its wide range of colours and applicability.

Blind \ PROJECT

The project blind finish is made of strong synthetic material that is ideally suited for high-traffic areas. The material is waterproof, resistant to abrasion, UV light and stains.

practical information

ABOUT YOUR OWN UNIQUE RUG

1\ RUG SURFACE CALCULATION

Calculate by measuring the highest and widest measurements of the chosen size and shape.

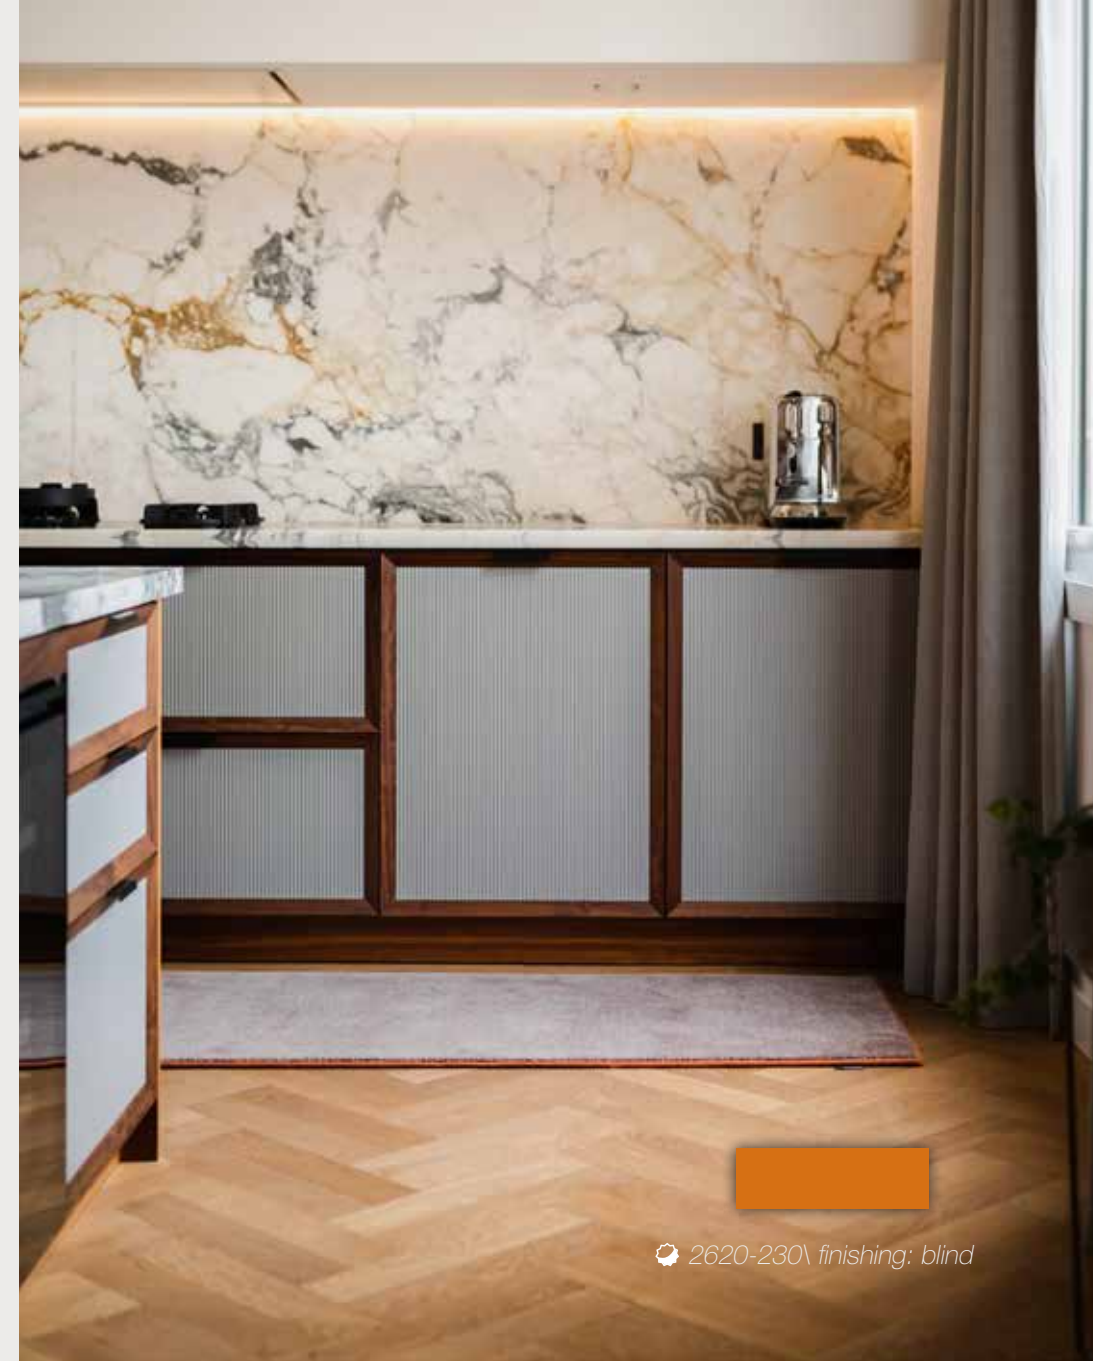

2\ THE FINISHING TOUCH

For finishing, it is important to choose the right material. Not every carpet is suitable for a volume finish; a blind finish always suffices. For more information, see the advisory price list.

3\ DESIGN

Do you have an idea or design? We are happy to think and design with you. A small sketch in PDF, JPG or a DXF-file will do.
